

1. Operational Risk Assessment Report – Q2 2025:

- Systematic risk assessment of sys1 following ENISA guidelines.
- Identifies threats specific to electrical grid control software and SCADA vulnerabilities.
- Includes mitigation plans: network segmentation, secure VPN access, and periodic patching.
- Document Reference: DOC-SYS1-RA-Q2-2025.

2. Incident Response Plan (IRP) – sys1:

- Documented IRP tailored for electricity operations.
- Includes cyber incident detection, reporting, and recovery procedures.
- Includes exercises completed in March 2025, covering grid disruption scenarios.
- Document Reference: SYS1-IRP-2025.

3. Security Monitoring Logs:

- 24/7 monitoring evidence from SIEM system.
- Log samples from June 2025 demonstrating active monitoring of sys1 operational networks.
- Includes alerts for unauthorized remote access attempts.
- Data Repository: SIEM-SYS1-JUNE-2025.

4. Third-party Audit Report:

- External audit conducted in April 2025 validating compliance of sys1 with NIS2 Directive Annex I.1.a obligations.
- Audit confirms enforcement of multi-factor authentication, regular vulnerability scanning, and secure patch management.
- Report Reference: AUDIT-SYS1-NIS2-2025.

5. Employee Awareness Training Logs:

- Records showing that 98% of operators and engineers managing sys1 completed cybersecurity awareness training, including NIS2-specific modules, in the last 12 months.
- Training Platform: LMS-SYS1-TRAINING.
